

Crew Restraints—Military

Leading restraint technology is now available for the world's armed forces.

As the world's leading provider of safety and securement products for aerospace and ground transportation, AmSafe® has applied experience and knowledge in developing restraint systems specifically for military applications. These unique systems are designed to protect military personnel in areas of conflict, both on and off the battlefield, where reliable safety systems are critical.

Specifically designed to protect military personnel

When we designed a restraint system appropriate for military applications, we applied our expertise about vehicle dynamics and the operating environment. We knew that traditional restraints might not be suitable. We therefore had to test and configure our restraints so that we could incorporate enhancements to our proven seatbelt technology for individual military applications. AmSafe restraints are currently being used in both vehicle and aviation defense applications worldwide. Our restraints endure rigorous testing to replicate real-world use, and our in-house dynamic testing capabilities are unrivalled in the industry. From concept through to production, AmSafe restraints continually evolve to meet the distinctive demands of our military customers.

Crew Restraints—Military

AmSafe restraints incorporate the most advanced technology available for passengers and crewmembers. We use advanced materials, manufacturing techniques and in-house dynamic testing along with continual research and development to ensure passengers and crew are safe and secure.

Ground Vehicle Restraint Systems

- 3-point static and retractable.
- 4-point static and retractable.
- 5-point static and retractable.
- Load-limiting retractors.
- Harsh environment hardware and retractors designed to reduce the introduction of debris.
- Unique restraints for enhanced BLAST protection.
- Inflatable restraint technology.
- Pretensioner restraints.

Current Aviation Restraint Solutions

- UH-60 Helicopter – UH-60 Gunner
- C-17 Globemaster – CH-53K Helicopter
- We also offer several solutions for other rotorcraft and fixed-winged applications.

Worldwide Customer Support and Service

- HMMWV
- Stryker
- FMTV
- MRAP
- Bradley
- Pinzgauer
- Land Rover
- BLAST seats
