

Child Aviation Restraints

Finally, an aircraft restraint designed specifically for children.

Keeping children safe during flight has long been a concern of airlines worldwide. The Child Aviation Restraint System—CARES™—is the world's first passenger restraint system specifically manufactured by AmSafe® for children. The system is certified for children who weigh between 22 and 44 pounds and who are occupying their own seat. This supplemental restraint interfaces with the existing standard seatbelt, producing a low-cost, easy and effective solution for improved child safety. CARES is not only lightweight but adjusts to fit most economy or domestic first class airline seats.

Gain Peace of Mind by Knowing That Children Are Safe and Secure

- Safety is enhanced during take-off, landing and turbulence.
- Comparative 16g impact test proves that CARES provides better protection for children than a standard lap belt alone.
- CARES is more convenient for both parents and flight crew than traditional airline-approved automotive child seats.

Additional Benefits

- The safety restraint is small and compact, the unit weighs less than 1 pound and it takes about one minute to install.
- Passengers no longer have to carry heavy, bulky car seats through the aisle and struggle to maneuver into the row.
- Its ease of use contributes to fewer passenger boarding delays.

Manufacturing Operations and Service Facilities Across the Globe

FAA Approved

The CARES device is the first alternative airplane child safety system that the Federal Aviation Administration (FAA) has approved to be carried on and installed by passengers on U.S.-registered Part 23 and Part 25 aircraft for any of their domestic or international routes. Use of the CARES on non-U.S.-registered aircraft must be approved by the local Foreign Civil Aviation Authorities (FCAA).

Safety Precautions

- Designed for air travel only—not for use in motor vehicles.
- May not be installed on seats located in exit or emergency rows.
- Approved to be installed in forward- or aft-facing seats only.

Worldwide Customer Support and Service

AmSafe is the world leader in aviation restraints. We have continuous customer support and service centers located around the world, so you can rely on AmSafe 24 / 7 / 365 to provide you with technical expertise for your restraint requirements.
