

Cargo Pallet Nets

The choice of over 80 percent of the world's airlines.

Our cargo nets are built to last – it's a fact. This is why more than 80 percent of the world's airlines choose AmSafe® for their cargo-restraint solutions with over 30 certified pallet net series. Our comprehensive range of pallet nets is recognized worldwide as being the safest and most cost-effective restraint solution in the industry.

Our knotless net construction maximizes the strength-to-weight ratio and reduces the need for extensive repairs. When coupled with our proprietary anti-abrasive process, which extends the net's life, the knotless construction reduces snagging, and when compared to other nets, enables faster build-up times for loads. What's more, our nets also include a minimum 25% degradation allowance as recommended by the International Air Transport Association (IATA).

State-of-the-art Technology

The AmSafe pallet net is the only certified form of textile restraint that at any point during its life may be called upon to handle up to 6.8 tons at 3g to protect aircraft integrity. This is why all our equipment has been designed to exceed the stringent requirements of the Federal Aviation Administration (FAA), European Aviation Safety Agency (EASA) and IATA.

- *Performs in accordance with NAS 3610 Revision 10 and IATA 50/2.*
- *Available in 64", 80", 96" and 118" heights (max).*
- *Key airworthiness requirements – FAR/CS 21, FAR/CS 25.853, ETSO and TSO C90c.*
- *Approved by the FAA and EASA.*
