

Lightweight Seatbelt

The number-one seatbelt just got lighter.

Every time you fly, chances are you buckle up with AmSafe®. Now, the world's leading seatbelt has gotten lighter – nearly twenty-five percent lighter than our traditional seatbelt.

The new lightweight seatbelt has the same patented features and performance qualities you have come to expect from AmSafe restraints. It has the same attach points as the conventional AmSafe seatbelt and can be easily retrofitted on both premium and economy seats.

Using high-performance materials and design techniques, AmSafe has developed a passenger seatbelt that can provide significant weight savings when used throughout an airline's fleet.

AmSafe has also improved the design of its traditional teardrop buckle. The new ergonomic style of the AmSafe buckle is nicely suited for the modern seats and interiors of new aircraft yet meets the state-of-the-art standards of 16g compliance. The new seatbelt features include the following:

- *Lighter in weight when compared to a standard aviation seatbelt.*
- *Ergonomic clam-shell buckle design.*
- *Ninety-degree buckle release.*
- *Available in polyester-webbing with over 100 color options.*
- *Easy retrofit with existing attach points.*
- *Accommodates both premium and economy seats.*
- *Available with custom finishes, plating and logos.*
- *Rated strength up to 3,000 lbs.*
- *Meets TSO C22g requirements.*

Manufacturing Operations and Service Facilities Across the Globe

Lightweight Seatbelt

AmSafe has been in the aviation restraint business for more than thirty years, and we continue to look for ways to improve our products. The new lightweight seatbelt is an example of taking a proven technology and modifying its characteristics to meet the challenges of our customers. This lightweight version is not meant to replace the standard AmSafe seatbelt but rather offers our customers a modern and lightweight alternative.

Repair and Service

- Refurbish to full production standard with full manufacturer's warranty.
- Full inspection upon receipt and rebuild to customer-agreed standards.
- Certified to meet all aviation authority requirements (FAA and EASA).
