

QuickShield RPG Armor Replacement Kit

Tarian QuickShield – protecting your investment.

Tarian® QuickShield™ from AmSafe® is a lightweight textile net that is used to replace damaged or missing slat armor. The QuickShield kit can be easily stowed in any vehicle and when needed, it can be immediately fitted by the crew. Tarian QuickShield provides vehicles with continued protection against RPG threats with no disruption to their mission, and also allows those inactive vehicles waiting for slat armor repairs to be immediately returned to operational service.

QuickShield utilizes the same proven technology of the Tarian net system which has been in service since 2009. Similar to the original Tarian system, QuickShield provides the exact lightweight performance and superior RPG protection. The Tarian QuickShield net will continue to provide RPG protection on vehicles for up to six months before it should be replaced by another kit.

The Tarian QuickShield kit is comprised of a vacuum-packed net together with fastening materials and simple installation instructions. Tarian QuickShield kits are available in two sizes: a small kit sized at 100cm x 44cm and a large kit sized at 170cm x 100cm. AmSafe recommends that vehicles are supplied with both small and large kits to allow for a wide range of armor damage situations. Tarian QuickShield can be deployed with minimal training. A comprehensive training DVD is available and AmSafe can provide training support to meet specific customer needs.
