

# QuickZip® Pallet Net – Military

## For faster load-build and breakdown of palletized cargo.

When military personnel are working in areas of conflict, it is critical to restrain cargo quickly within the aircraft because a moving load can put both crew and aircraft at risk. As the leading designer and manufacturer of cargo pallet nets, AmSafe® recognizes these challenges and provides cargo-securing solutions for many of the world's armed forces.

### Reap the Benefits of the QuickZip®

#### Single-Piece Construction

- The patented QuickZip® pallet net allows you to build and break down cargo loads faster than you can when using a three-piece net.
- The net disassembles 80 percent faster than a conventional one.
- The net eliminates the need to assemble three individual parts to form a complete net assembly.
- It can restrain both high and low loads.
- The net does not have separate side and top nets which equates to a single part number for inventory and procurement.
- The single-piece net construction equates to approximately 35 percent less weight per pallet.

#### QuickZip® Fastening

- The net's simple looping system, which secures its four corners, allows you to assemble and disassemble the net much faster than a conventional net.
- You can quickly zip or unzip the net, saving valuable time in the cargo-handling process.
- Its patented design reduces the need for additional tie-down restraints.

#### Quality, Maintenance & Support

- AmSafe maintains complete control of the manufacturing process from start to finish.
- The net's knotless design, combined with a proprietary anti-abrasion coating, reduces snagging and resists wear.
- The net's minimal use of metal fasteners reduces susceptibility to corrosion and decreases how often you must replace parts.
- Comprehensive manuals outline how easy the net is to maintain and repair.

#### Technical Specifications

- Available in various heights up to 110" to maximise capacity utilisation.
- Fits both standard (108" x 88") and half-size (54" x 88") 463L pallets.
- Designed to meet MIL-DTL 27443 and 27444 load restraint requirements.

## QuickZip® Pallet Net – Military

Pallet Size (inches)	Net Height (inches)	Part Number	Maximum Load	Matches Pallet
54 x 88	72	QZ30-0277900	5,000 lbs	HCU-10/C HCU-12/E
108 x 88	96	QZ30-0125000	10,000 lbs	HCU-6/E
108 x 88	110	QZ30-0245000	10,000 lbs	HCU-6/E

AmSafe is a premier supplier to the world's military and government organizations. We work closely with many military forces, trials and evaluation organizations, allowing us to understand the often demanding and difficult situations that exist for cargo lifting and restraint products. We apply this field knowledge to design products that meet specific military requirements. In short, AmSafe designs and manufactures a breadth of solutions to meet our customers' most challenging transportation requirements, and we provide quality, timely and cost-effective solutions to customers worldwide.
