

# Tarian RPG Protection System

## *Lighter and more effective RPG protection system.*

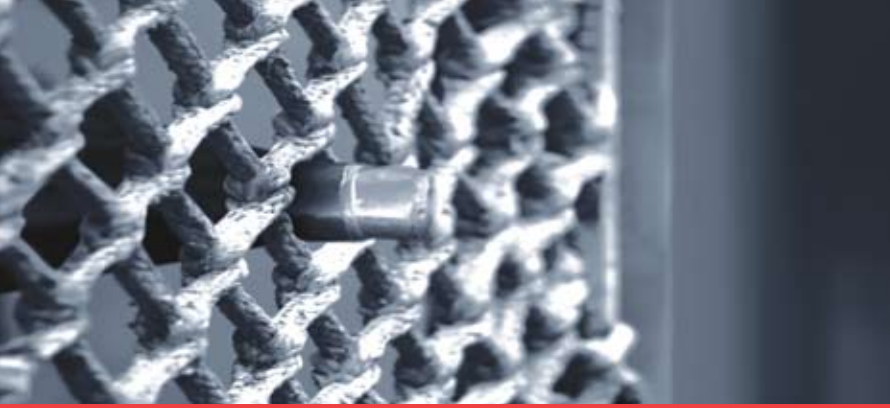

*Tarian® – the world's lightest and highly effective solution for protection against rocket propelled grenades (RPGs). Tarian, a net solution from AmSafe®, is significantly lighter than other protection systems and has excellent visibility characteristics. Developed in close collaboration with the U.K. Ministry of Defence (MOD), Tarian has been extensively tested – in the U.K. and the U.S. – to include over 550 live firing shots. This testing has verified both a high level of performance and a multi-hit capability. Tarian was launched in 2009 and is currently in service fitted to British Army Heavy Equipment Transporters.*

*The patented Tarian system provides weight savings of up to 98% when compared to traditional steel slat armor and is up to 94% lighter when compared to aluminum slat armor. The weight saving potential of Tarian can liberate vehicle performance, improve reliability, reduce maintenance down time and cost, or be used to facilitate additional protection elsewhere on the vehicle. In addition, Tarian can protect vehicles, such as the HMMWV, that cannot accept the weight of traditional RPG armor.*

*The Tarian mounting system utilizes flexible mounts which allows the net to withstand the rigors of field use and enables it to be less susceptible to damage than slat armor. Tarian nets are quick and easy to fit without special tools and the ease of installation and repair contributes to minimal training requirements. Tarian nets do not need to be tensioned, which simplifies installation and contributes to its ability to perform in many damage situations that would render alternative solutions ineffective.*

*AmSafe can optimize the design of Tarian for specific vehicles which will minimise the number of net types per vehicle and thereby reduce the number of spare part numbers needed. And should the need arise, Tarian QuickShield™ replacement kits can be carried on board vehicles to enable instant temporary repairs to damaged nets.*

Manufacturing Operations and Service Facilities Across the Globe

## Tarian RPG Protection System

- More effective than slat armor.
- Multi-hit capability.
- Lightweight – up to 98% lighter than steel slat armor; 94% lighter than aluminum slat armor.
- Modular, flexible net solution that is much less susceptible to damage than slat armor.
- Easy and quick to fit, and can be replaced in the field with minimal training and without the use of special tools.
- Spares available to carry onboard for instant replacement of damaged parts.
- Compact design for ease of transport and stowage.
- Reduced weight contributes to lower transportation costs.
- Excellent visibility characteristics.
- Available in several colors to match the vehicle.
- Net weight 0.8 kg/m<sup>2</sup>.
