

LIGHTWEIGHT SEATBELTS

Every time you fly, chances are you buckle up with AmSafe. Now, the world's leading seatbelt has just got lighter – fifty grams lighter than our traditional seatbelt.

THE NUMBER-ONE SEATBELT JUST GOT LIGHTER

The new lightweight seatbelt has the same patented features and performance qualities you have come to expect from AmSafe® restraints. It has the same attach points as the conventional AmSafe seatbelt and can be retrofitted onto any airline passenger seat.

Using high-performance materials and design techniques, AmSafe has developed a passenger seatbelt that provides significant weight savings when used throughout an airline's fleet. AmSafe has also improved the design of its traditional teardrop buckle. The new ergonomic style of the AmSafe buckle is perfectly suited for the modern seats and interiors of new aircraft yet meets the state-of-the-art standards of 16g compliance and retains the patented teardrop shape passengers know and trust.

FEATURES AND BENEFITS

- Ⓢ Lighter in weight when compared to a standard aviation seatbelt
- Ⓢ Ergonomic lift-release buckle design
- Ⓢ 90 and 30 degree buckle release angles available
- Ⓢ Available in polyester & nylon webbing with over 160 color options
- Ⓢ Can be retrofitted with existing seat attach points
- Ⓢ Accommodates both premium and economy seats
- Ⓢ Available with custom plating and customer logos
- Ⓢ Meets TSO/ETSO C22g requirements

The lightweight seatbelt is designed to meet the new considerations given to lightweight seats and aircraft interiors.

Available with custom plating and customer logos

AmSafe has been in the aviation restraint business for more than 50 years, and we continue to look for ways to improve our products. The new lightweight seatbelt is an example of taking a proven technology and optimizing its design to meet the challenges of our customers. This lightweight version is not meant to replace the standard AmSafe seatbelt but rather offers our customers a modern lightweight seatbelt option to support environmental and cost-savings initiatives.

REPAIR AND SERVICE

- ⊗ Refurbish to full production standard with full manufacturer's warranty
- ⊗ Full inspection upon receipt
- ⊗ Certified to meet all aviation authority requirements (FAA, CAAC, ANAC, CAA, and EASA)
